## THE GERMAN NOTE.

The German aggression that Great Britain is fighting foul in this war makes straits reading when, as a matter of fact, Germany had broken all the laws of civilized warfare, both on land and sea. In his note, the United States she pleads that the submarines are compelled to sink all neutral vessels without warning because these vessels are being used to prevent supplies from the armadas. The fact is that Germany was already sinking these vessels without warning and had issued notice that when the war zone campaign will still be honored in Canada. Hon. C. J. Doherty, the Minister of Justice, opposed Mr. Bleeker's bill to abolish capital punishment, quoting figures to show that the U.S. has made great strides in number. He said that in the last three years, the total number of convictions for murder had been 75. Of that number 38 had been committed by foreigners newly arrived in the country. Of the number of persons foreign to 25 were done by persons who committed in which capital punishment had been abolished. From this he argued that it would be unsafe to withdraw the deterrent of hanging. He thought the death penalty was an effective deterrent for most people, but the time might come when it would not suffice to abolish capital punishment. But that is not now. We fail to see any demand to the country at present for the abolition of this form of punishment. Neither the churches nor any of the reformatory or other organizations claim that capital punishment is no longer needed. We are of the opinion that there is no need of such a stand of public opinion. It may be that hanging is more of a deterrent than imprisonment. But is it doubtful if there are more murders in Michigan, per head of population, than there are in New York State for instance?

One of the objections to capital punishment is that a few murderers escape punishment altogether, getting the benefit of the doubt, because juries are reluctant to send a man to the gallows unless on the most convincing evidence, where, in many instances, the evidence is not clear cut. Another evil connected with capital punishment is the inevitable repetition and wrangling that follow such a sentence. No master here hideous the crime there are people with sign petitions on behalf of the murderer.

## WEAT OR DAY CANTEEN.

We have received a copy of a resolution telegraphed to Sir Robert Bond, the Ontario Women's Christian Temperance Union, stating that it was "with amazement and alarm that we learn of the re-establishment of the 'wet canteen' in the Canadian contingent, and that the War Office has given its consent to the opening of such canteens as she has the perfect right to do, and is quite capable of doing, with due to ships, and more money, and the income of the municipality is not growing or increasing rapidly enough to meet the growing expenditure. Twenty-one mills will not be enough to finance the canteens the coming year. There will be debts and expenses appropriated." But evidently the Mayor and Controllers would rather face these than take the responsibility of striking a higher rate. There is a striking lack of civic audacity for the position the city finds itself in.

But it is the result of circumstances that neither the Mayor nor the Controllers can be held responsible for. The people want the best of everything. They wanted the Hydro Electric plant, new schools for their children, they clamor for roads and water, and our firemen and police force are necessities. Their money has been spent in buying parks, in supplying food and work for the unemployed. These all cost, and the money either to come out of the taxes or be borrowed, to pay for them.

## EDITORIAL NOTES.

The Kaiser talks about "Our beloved Prussia." What about beloved Britain?

The City Treasurer is overworked now. To reduce his staff against his advice would be a mistake.

New Jersey will vote on the woman suffrage amendment next September. That means the capture of another trench.

How would it do to make it compulsory for parents to look after their children's health to say nothing of their eyes?

The United States will not be stampeded with war on anything like a "Remember the Maine" cry. Honors cannot do such a thing a second time.

The Niagara Falls, N. Y., Gazette rejoices because passenger rates have been increased between that place and Buffalo. It wants the people to buy at the morning newsstands.

We publish to-day an editorial from the Montreal Pharmaceutical Journal

which is as follows:

"The Canadian Pharmacists Association has issued a circular to all members to keep down expenses by saving."

about the war taxes on patent medicines, which our two members of Parliament should acquaint themselves with.

The Hon. Mr. Doherty and Sir George Grey are being taken into the confidence of the British Government, and attend the meetings of the Committee of Imperial Defence. Would it be too much to expect Sir Robert Borden to call Sir Wilfrid Laurier to his conference?

By length of service on the Bench Hon. C. J. Doherty fulfilled the condition required by law for grant of pension, allowing him to retire. His pension is exactly of the same kind as that of a man who drew a pension from the Royal Navy. He was kept back from him while he was in actual service.—Toronto Mail and Empire.

Sir Doherty draws a pension as a retired judge. He draws his salary as Minister of Justice, and draws his indemnity as a member of Parliament. Pretty good for Mr. Doherty.

The Buffalo Express admits that Sir Edward Gray makes two strong points in his reply to the U. S. Government.

He says that 25 neutral ships have been destroyed by the Germans in the war zone, and that the Germans have sunk without warning and never have paid compensation.

He cannot do that. Not only does Germany propose to torpedo these vessels for sinking the ships, crews and all, because these ships will, if possible, save themselves from being sunk. Had she done, as Britain did, capture enemy ships, make them into port and sink them, the Germans would have no objection.

But she cannot do that. Not only does Germany propose to torpedo these vessels with the intent to strew the war zone with floating mines, which cannot distinguish between armed and neutral ships and American vessels which enter the zone run the chance of only being torpedoed, but of being sunk by mines. These mines are sown for all.

The German note also complains that the United States are selling nations of war to Britain, while Germany gets none. With this subject, the German Foreign Minister, Dr. vonзов, says: "The U. S. are quite willing to sell Germany the same article that they are selling to Britain." Germany cannot buy. This is not the fault of the States. It is pointed out, that during the Russo-Jap war and the Balkan wars, Germany did a big trade with these countries in war munitions.

So far the United States Government is silent on the matter, but the New York newspapers this morning speak plainly against what the World calls Germany's Lynch law, and pointedly warn the Kaiser that it was "with amusement and alarm that we learn of the re-establishment of the 'wet canteen' in the Canadian contingent, and that the War Office has given its consent to the opening of such canteens as she has the perfect right to do, and is quite capable of doing, with due to ships, and more money, and the income of the municipality is not growing or increasing rapidly enough to meet the growing expenditure. Twenty-one mills will not be enough to finance the canteens the coming year. There will be debts and expenses appropriated." But evidently the Mayor and Controllers would rather face these than take the responsibility of striking a higher rate. There is a striking lack of civic audacity for the position the city finds itself in.

But it is the result of circumstances that neither the Mayor nor the Controllers can be held responsible for. The people want the best of everything. They wanted the Hydro Electric plant, new schools for their children, they clamor for roads and water, and our firemen and police force are necessities. Their money has been spent in buying parks, in supplying food and work for the unemployed. These all cost, and the money either to come out of the taxes or be borrowed, to pay for them.

## OUR TAX RATE.

With a load of debt left over from last year, with special contributions to relief, patriotic and other funds, and an ever-increasing expenditure, both controllable and uncontrollable, we are not surprised that the city authorities find it impossible to tax less than \$100,000,000. The various departments holding the School Board, were more money and more money, and the income of the municipality is not growing or increasing rapidly enough to meet the growing expenditure. Twenty-one mills will not be enough to finance the canteens the coming year. There will be debts and expenses appropriated." But evidently the Mayor and Controllers would rather face these than take the responsibility of striking a higher rate. There is a striking lack of civic audacity for the position the city finds itself in.

But it is the result of circumstances that neither the Mayor nor the Controllers can be held responsible for. The people want the best of everything. They wanted the Hydro Electric plant, new schools for their children, they clamor for roads and water, and our firemen and police force are necessities. Their money has been spent in buying parks, in supplying food and work for the unemployed. These all cost, and the money either to come out of the taxes or be borrowed, to pay for them.

Again, after all the cutting and slashing and cheapsaving, it is now that nothing short of a twenty-one mill rate will suffice. Some day perhaps when we get into the next war, limited taxes, when we're in the cockpit, may be your full share, and so may be raised for the general taxpayer. It should be laid down as a rule that there will be no special favors granted to those who may come within the city limits. We notice the Toronto Mail and Empire in their morning paper, that the morning newsstands to keep down expenses by saving.

The Montreal Pharmaceutical Journal

says:

"The weakness of the argument is that the war was mainly the outcome of administrative extravagance on the part of the German Government. It is the philosophy of force. Armament is the purpose of defence. Armament is the purpose of offence. War is a foolish and cowardly proceeding. We have now seen that the military parade of nation transcends the poor basis of application of a false conception of the function of the military except insofar as it is a means of the continued existence of the German Empire. The war was mainly the outcome of the same idea as an dangerous in itself as Germany, in its

## FIRST DAY'S BLOCKADE WAS DEVOID OF RESULT

German Piracy Policy Got No Victims In British Marine.

## Great British Squadrons Are Keeping Strict Watch.

London, Feb. 18.—The first twenty-four hours of the German "blockade" of the British Isles, which began yesterday, that not a single British ship has sunk as far as is known, nor has a single German submarine been sighted. The only visible evidence of Great Britain's regard for the blockade is that some of the Channel lines to Holland and Germany have suspended passenger services, although they do suspend freight boats as usual.

The honor of being the first great liner to enter a port in the United Kingdom after the inauguration of the German submarine warfare belongs to the White Star steamer Adriatic, which entered the harbor of Liverpool yesterday morning, an enthusiastic greeting from all sides. Captain B. F. Hayes, R. N., skipper of the Adriatic, said that he sent her along at a good pace, minded his own business all the way over, and was not at all in the least bit worried about what the Germans might have prepared for him.

The Adriatic flew the British flag throughout the voyage. The passengers became anxious when 26 ships from Liverpool, and the same day they were swung from their davits and made ready for immediate battle. Not a single watch was seen during the voyage.

For the last two days there were no ships sunk to-day not by any means indicate that the Germans will not overtake us in the number of ships sunk per point of time. It will take some time for the fleet of submarines supposed to have been dispatched to arrive, and the same policy on the part of the Germans will be adopted on the coast, and it may be several days before much evidence of the new policy is had.

**KEEPING CLOSE WATCH.** In the meantime the greatest anxiety of the British public is keeping a close watch for enemy vessels, particularly for mine-layers, and the Admiralty has assembled at several ports, ready for action in case the Germans should attack in force.

The confidence of the British public generally in the navy and its ability to meet the emergency is reflected in the fact that there has been no increase in marine insurance rates, and that the Government has not increased the amount paid for fishing vessels at the same time making arrangements to paralyze the German fleet which was to be the result of hostilities. The Government has decided to extend to men of the crew of British ships who have not yet taken their lives five or six months owing to attacks by enemy warships or aircraft the same scale of pay as the men of the Royal Navy, and their dependents of similar rank in the navy.

The Government has also decided to make the pay of the men of the Royal Navy more than twice that of the men of the British Merchant Marine, which is the oldest British corporation of shipowners, has written to William Rowntree Church, First Lord of the Admiralty, to assure him it is not concerned over the German threat, and reverse it that it is not in a position to reverse it.

The latter declares that all masters are ready to emulate the example of the Royal Navy in the defense of the Empire, and suggests that in view of the seriousness of the situation over the world's shipping, the naval command without pay was bound to be efficient in view of the risk involved. It is considered that in view of the present condition of shipping and the high cost of shipping, it would not be burdened by such a move.

The crews of one Danish and three

## BRITONS WERE BADLY USED

Prisoners of Germans Got Very Bad Treatment.

Some of Those Exchanged Tell Awful Tales.

London, Feb. 18.—In describing the arrival at Rotterdam of 100 British who had been incapacitated, and are on their way home from German camps, the correspondent of the Daily Mail says:

"The soldiers were welcomed by the Dutch, who gave them the Dutch cigarettes and tobacco and loaded them with gifts of pipes, tobacco, cheese, chocolate, and dried fruit. They were wrapped in the Dutch colors. Many of the soldiers went at the kindred show them. All were severe-

ly wounded, and the injuries of many were terrible. Many of the men were on crutches, and the others were unable to know how many German prisoners were treated in England, as they had not been told that the prisoners had been adequately treated."

The British prisoners thought they were to be given the same treatment in the German camps. One non-commissioned officer said:

"We were treated all right at the beginning, but the food was bad, the water bad, and the conditions bad."

"The German camp had a good deal of discipline, they were tied to a post for hours. The food, which was chiefly meat, was poor quality and small in quantity."

The clothes were rags. When the men protested that they were not being fed, the Germans cut off our food supply."

This man confirmed the previous report that the French prisoners were treated in the most friendly manner, in contrast to the German treatment of the British prisoners.

**THROBBING, NEURALGIC HEADACHE CURED**

HEAD-SPLITTING DISTRESS VANISHES INSTANTLY

This Wonderful Curative Liniment Never Fails.

RUB ON NERVILINE

Nervilane quickly cures in twenty-four, ten times cured. Little neuralgic pains grow into big ones, but "Nervilane" in ten minutes drives them off. Even a slight congestion will remove the nerve congestion that causes the pain.

Now, penetrate deeply into the sores, reaches the source of inflammation, drives it out root and branch. Every drop of Nervilane is po-

tent in pain-subduing power, and its strongest charm lies in the fact that it removes the cause to the very last drop. Nervilane is the only liniment whose power is in direct proportion to its strength, greater in strength five times.

We guarantee Nervilane will cure

neuralgics—not only relieve it, but

remove the cause.

It is the same way it will cure rheumatism, sciatica, stiffness and rheumatism.

Even a slight application will remove the nerve congestion that causes the pain.

Now, penetrate deeply into the

sores, reaches the source of in-

flammation, drives it out root and

branch. Every drop of Nervilane is po-

tent in pain-subduing power, and its

strength is in direct proportion to its

strength.
